

## Legacy Options

### Sterling Silver Alphabet Letter Block and Birthstone Position

To include initials or names in sterling letter blocks, you need to indicate on each strand what is to be spelled out. At this point you must also include the birthstone placement - choose which birthstone is at the beginning of the text and which birthstone should be at the end.

For the adult Bracelet, you can have up to 11 letters per strand including spaces. (*Maximum is 7 for a child's bracelet.*)

Complete one **Strand Details** box for each Strand that you have ordered. (Ignore the others). For each, indicate first birthstone (month), text up to 11 letters (e.g. initials or name) (*7 for child's*), second birthstone (month). (*Only one strand for a child's.*)

Example of 3 strand bracelet:

**Strand 1 Details:** July, JULIA, July

**Strand 2 Details:** April, JOHN W, April

**Strand 3 Details:** November, NANNY, November

Weight and aesthetics is a consideration in the design of the bracelet. The build by strand order is top to bottom, left to right. When designing a family bracelet, consider oldest to youngest in this order.

Note: You can design based on appearance and arrange the birthstones to coordinate in an esthetically appealing way to your taste, style and sentiments.
